## SKILLS

|                  |                                                                                 |
|------------------|---------------------------------------------------------------------------------|
| Languages:       | C++, Python, C, JavaScript, SQL,                                                |
| Frameworks:      | Express, NumPy, LangChain, Scikit-learn, FastAPI, Celery, FastMCP, Uvicorn      |
| Tools/Platforms: | PowerBI, Excel, PostgreSQL, Redis, Docker, Docker Compose, Git, GitHub, Postman |
| Core Skills:     | Advance DSA, Data Science, Database Design & ACID Transactions                  |
| Soft Skills:     | Problem-Solving, Critical Thinking, Leadership, Adaptability                    |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                 |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>RAG Document Retrieval System</b>   <a href="#">View Repo</a>                                                                                                                                                                                                                                                                                                                                                                                | Jan' 26 |
| <ul style="list-style-type: none"><li>Developed a RAG pipeline using LangChain and Google Gemini to enable accurate, context-aware querying of local document libraries.</li><li>Integrated ChromaDB to power semantic search, allowing the system to retrieve information based on intent rather than just keywords.</li><li>Developed a Streamlit interface for real-time, document-grounded question answering and data retrieval.</li></ul> |         |
| Tech Used: Python, LangChain, Google Gemini API, ChromaDB, Streamlit                                                                                                                                                                                                                                                                                                                                                                            |         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |         |

| <b>Crime in Los Angeles: Data Analysis – PowerBI Dashboard</b>   <a href="#">Live Dashboard</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Nov' 25 |
| <ul style="list-style-type: none"><li>Analyzed 1.1M+ LAPD records using Power BI and SQL to identify high-impact crime trends and demographic patterns in victim vulnerability.</li><li>Executed temporal analysis to uncover seasonal spikes and a "Severity Paradox" in violent offense timing.</li><li>Developed DAX-driven metrics to quantify the "Weekend Index" and compare crime velocity across timeframes.</li><li>Engineered interactive dashboards utilizing logarithmic scatter plots to visualize and correlate the relationship between weapon types and specific crime categories.</li></ul> |         |
| Tech Used: PowerBI, DAX, Excel                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>SociaVerse: Social Network for University Student</b>   <a href="#">Live Platform</a>                                                                                                                                                                                                                                                                                                                                                                                        | Mar' 26 |
| <ul style="list-style-type: none"><li>Collaborated with a team to build and launch a campus platform using Express.js and SQL to help students find and join local activities.</li><li>Simplified event discovery via a central hub for real-time updates, boosting student engagement.</li><li>Engineered a robust backend and database schema to ensure data persistence and manage concurrent user interactions, maintaining high performance during peak traffic.</li></ul> |         |
| Tech Used: Express js, SQL, Node.js, TypeScript, MongoDB                                                                                                                                                                                                                                                                                                                                                                                                                        |         |

## TRAINING

|                                                                                                                                                                                                                                                                                                                                                                             |         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>CipherSchools   A Guide to Machine Learning with Data Science</b>   <a href="#">Link</a>                                                                                                                                                                                                                                                                                 | Jun' 25 |
| - Jul' 25                                                                                                                                                                                                                                                                                                                                                                   |         |
| Learned core Machine Learning fundamentals with a Data Science focus.                                                                                                                                                                                                                                                                                                       |         |
| <ul style="list-style-type: none"><li>Solved multiple data-driven problems to strengthen analytical skills.</li><li>Applied Machine Learning concepts like regression and classification in exercises.</li><li>Developed a functional ML project using clean coding practices.</li><li>Worked with datasets, algorithms, and models to build predictive programs.</li></ul> |         |

## CERTIFICATES

|                                                                                           |          |
|-------------------------------------------------------------------------------------------|----------|
| Master Generative AI & Tools   Udemy   <a href="#">Certificate Link</a>                   | Sept' 25 |
| Coding Ninjas Codekaze   Naukari.com   <a href="#">Rank Certificate</a>                   | July' 24 |
| CipherThon 2.0: Final Round Participant   CipherSchool   <a href="#">Certificate Link</a> | Feb' 24  |

## ACHIEVEMENTS

|                                                               |         |
|---------------------------------------------------------------|---------|
| Codeforces: Active Participant   <a href="#">Profile Link</a> | Mar' 26 |
| Improved algorithmic thinking via complex problems.           |         |
| Solved 350+ DSA problems.                                     | Mar' 26 |

## EDUCATION

|                                                                       |                        |
|-----------------------------------------------------------------------|------------------------|
| Lovely Professional University                                        | Phagwara, Punjab       |
